

## EXHIBIT DAY PANELS

Each year there are less panels available to be borrowed from the Santa Barbara Fairgrounds. While many project groups have built panels to be used at Exhibit Day, many more are needed.

Starting in 2002, exhibitor and project groups are to bring one panel for each animal shown. The panel design below is preferred, but "Powder River" type panels which are designed for hogs and sheep are acceptable only if they are eight feet long and three feet high. Panels using fence wire or chain link are not suitable. It is very important that you don't bring several different kinds of panels. We will need enough of each type to do whole areas of pens and arenas.

If you have any Questions, please contact John Peterson at 688-5305.

### 4-H Lamb & Swine Panel

Material needed to make five (5) panels

20 @ 8 foot 1X6

8 @ 6 Foot 1X6

1 gallon exterior paint

nails
